TECHNOLOGY PLAN

Board of Trustees Meeting

3/23/2021
Executive Summary

Libraries provide vital access to cultural, educational, and informational materials. Technology has become integral to the services libraries provide and can be used to create efficiency and effectiveness in how services are delivered.

This plan focuses on the continuing renewal, consolidation, revitalization, and expansion of technologies to support delivery of evolving library services.
IT Department Mission

The IT department should provide a comprehensive first-class suite of services to external and internal library patrons, partners and employees. Library staff should see the IT department as a strategic business partner that can help them innovate, become more efficient and support them in their success.

The department should run efficiently and securely with a drive for results, transparency, accountability and collaboration. The department should strive to become a model for other libraries (and community-based non-profits) on how to effectively provide meaningful and impactful technological services to a diverse population of patrons. Patrons should feel inspired and supported by technology at the library.
**Goals & Initiatives**

Most of the initiatives that make up these goals require cross functional teams to implement and would not be achievable otherwise. This plan is used to create alignment and understanding across the organization of technological priorities.

**Goals**

- Focus on Impact & Outcomes
- Extend the Library’s Reach
- Expand Educational Opportunities
- Develop Spaces that Meet Evolving Patron Needs
- Enable One Library
- Drive Organizational Efficiency
- Improve IT Fundamentals

*Initiative details in the Technology Plan includes activities, key department involvement, and estimated costs.*
Implementation Plan

These initiatives expect to be completed within the next three to five years. Staff will be able to view progress and get updates on the execution of initiatives and activities by visiting the online planner board.
